

The Wide-Web Thermal Solutions

M10e Series Printers

The M10e wide web thermal industrial printers are ideal for a range of applications, including:

-  **Chemical Labeling**
-  **Automotive Labeling**
-  **Paper/Pulp Labeling**
-  **ODETTE Labeling**
-  **Shipping & Receiving**
-  **Multiple-Up Labels**

Wide-Web Industrial Printers

The M10e's are designed to handle media widths of 11.8" and print widths of 10.5" in direct thermal or thermal transfer modes. A sophisticated system of sensors and media guides assures proper media registration and simplifies paper loading.

Thermal Transfer Wrinkle-Free Operation

M10e printers utilize a revolutionary anti-wrinkle ribbon mechanism, which assures trouble-free operation in most thermal transfer operations, increases printer reliability, performance, ease of use, and greatly reduces down time and user intervention especially in mission critical applications.

Print Technology Replacement and Connectivity

The M10e finally brings benefits of thermal printing technology to markets and applications historically dependent on inferior print technologies such as impact, ink-jet, and laser. Thermal technology offers an array of benefits making the M10e an ideal candidate for applications involving print technology replacement. A large selection of user configurable Plug-In Interface Modules (incl. 10/100 Ethernet, and wireless 802.11g Wi-Fi) simplifies connectivity.
